“

*Medical Admission still remains complicated because of everchanging rules and multiple rounds of choice filling. iMAC intends to ease this Process for you through guidance and technical assistance.*

”

From the past few years, the policies with respect to medical entrance exams have been changing continuously. NEET has replaced the multiple examinations at institutional and state levels. Although NEET helped aspirants to focus on a single entrance exam, the process of medical admission still remains complicated as NEET qualified students are required to apply for different admission counselling processes conducted at All India Level as well as State Level. This creates confusion among aspirants and their parents. And with the constantly changing rules related to admissions and the preference forms for various rounds to be filled separately, many aspirants are facing difficulties concerning the admission process. There is also a dilemma regarding which college is to be preferred at the acquired score, or what should be the sequence of colleges in the various preference lists.

After having conversations with many of our past students, it is observed that inspite of having the required score, students landed into a college which was not their desired choice, because of the complexity of admission process.

Considering these facts, we at APMA are providing a dedicated counselling support in the form of iMAC in order to help medical aspirants through the merit-based admission process. We will guide and assist you right from filling the NEET application form till you get admission to a college.

I am sure that your journey through this maze of various institutes will be easier with Imac.

Regards and best wishes,

**Dr. Sheetal Shrigiri**

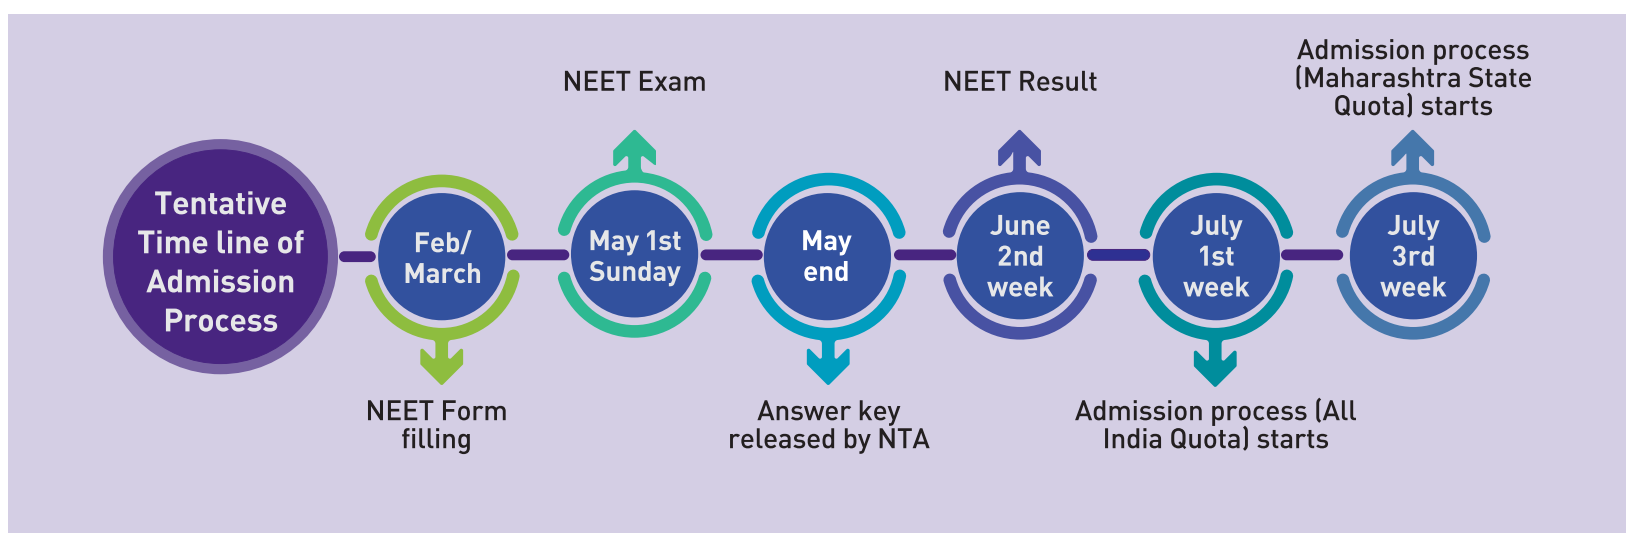

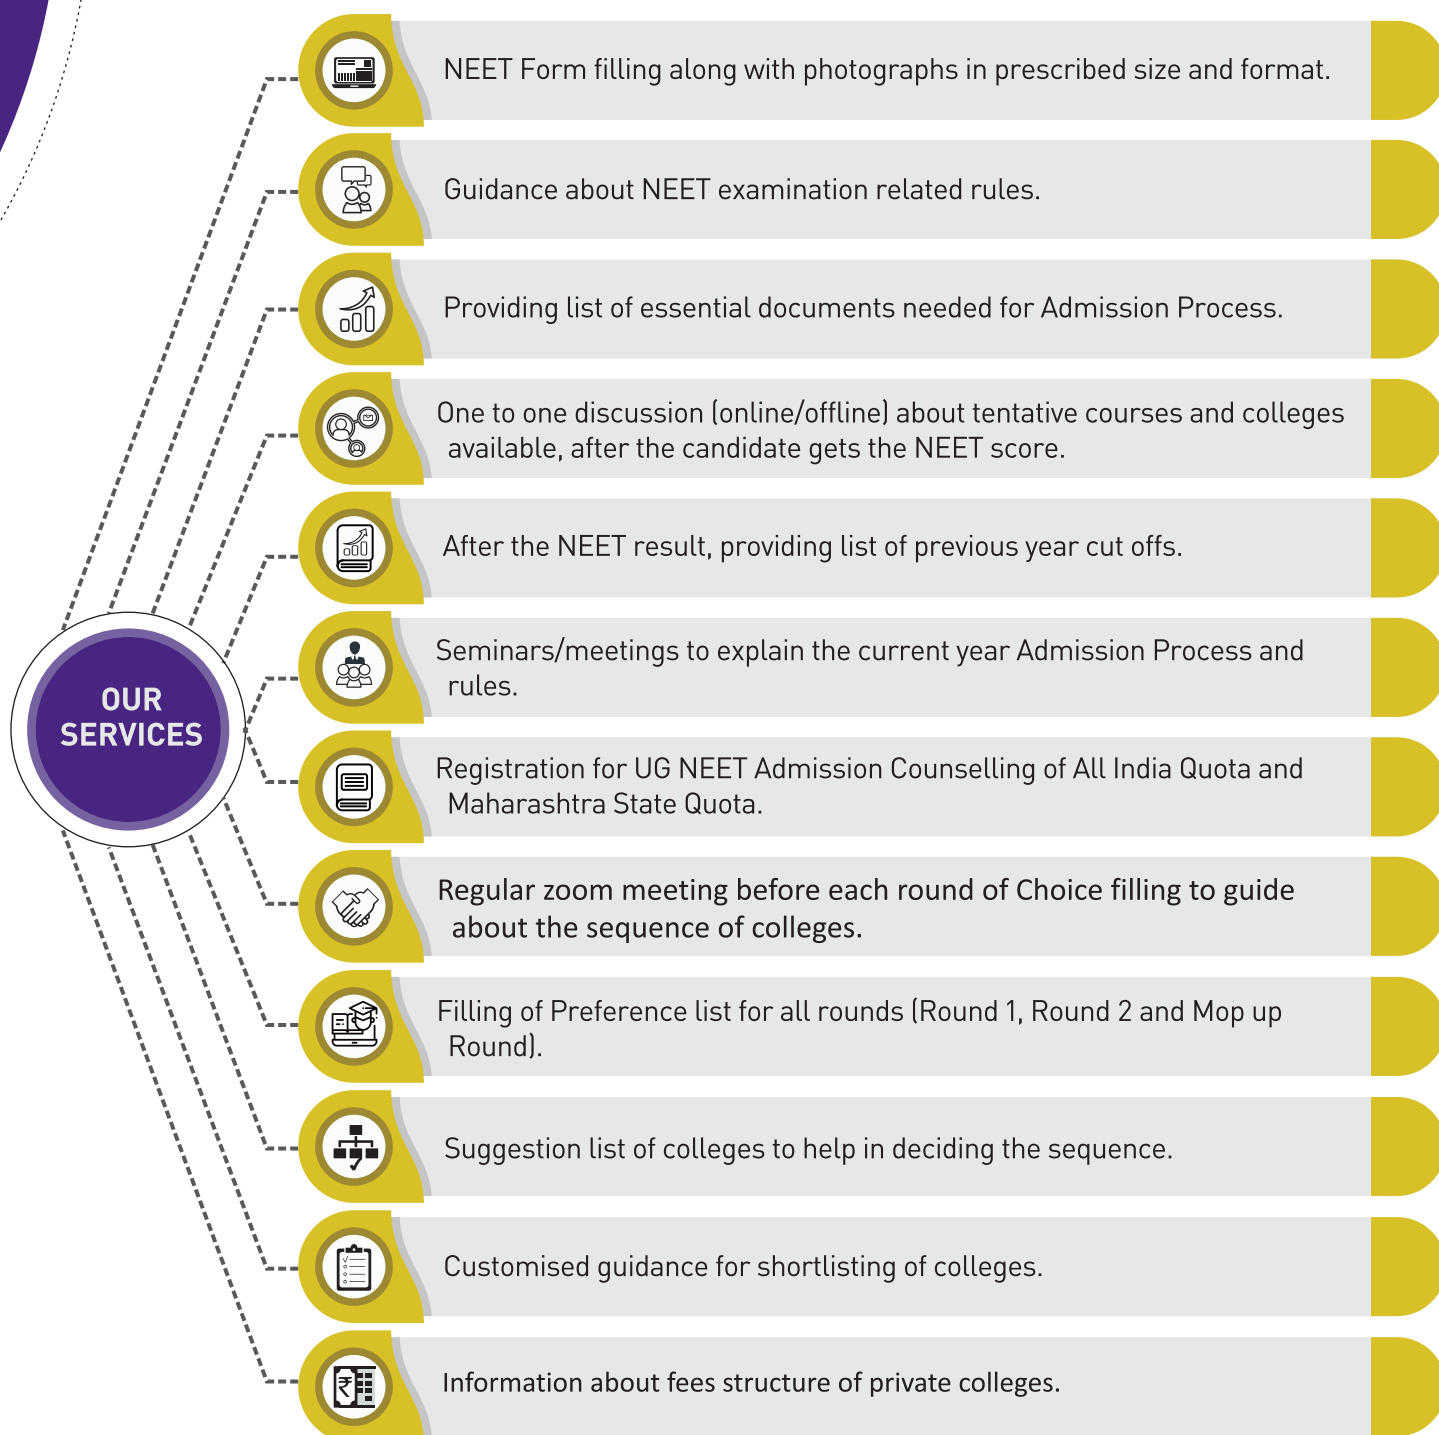

MBBS, DGO,

Diploma in Adolescent Counselling

## Testimonials

Admission process in medical courses is very lengthy and tricky. After NEET and the scores, the students hardwork is over and the parents have to become more vigilant. Every year the cut offs change, so filling proper choices becomes tricky. One small mistake and the child can loose the opportunity to get admission in good medical college. Thanks to Dr. Prabhu Sir, Dr. Sheetal Madam, Tejas Sir and Team iMAC, for making this process easy for us. Accurate analysis and cutoff prediction is the hallmark of this team. Giving realistic views and apt college list for every student is their speciality. Continuous updates of various notices keeps one well informed and thus reduces the chances of making mistakes in choice filling. iMAC team's individual consultation is very helpful. Aarya's admission process became smooth because of team iMAC. Thank you and best wishes to for your future endeavors.

iMAC 2023 batch

iMAC gave a positive vibe for all who opted it.... It gave a positive deflection and guidance to all whose parents were medicos or non-medicos. Keeping updated information of all the institutions made the college choice options much easier. iMAC had gave perfect guidance in marking the priority of institutions during the admission rounds. Hope this has made the life simpler for not only students but their parents too. Quick Responding to individual queries was more beneficial. Technical assistance for filling the NEET forms and admission forms was phenomenal.

iMAC 2023 batch

In my opinion, iMAC is doing an excellent job. I really appreciate your efforts and dedication. May it be a power cut or an internet issue, iMAC was efficient enough to deal with any problem with great patience, hope and a never dying smile. I truly admire Dr. Abhang Prabhu who came whole the way from Mumbai for the choice filling to guide the students. We will forever be grateful to you.

Thank you iMAC.
